DETAILED ACTION

Claim Objections

1. Claims 9 and 14 are objected to because of the following informalities: There is a grammatical error in the recitation of "waiting a predetermined period of time for a response from each of said registered mobile platforms **not then** communicating with said RF base station" in lines 16-18 and 17-19, respectively. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 2, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Haugli et al (U.S. Patent 5,991,279).

Regarding to claim 1, Haugli discloses a method for establishing a radio frequency (RF) communications link between an RF ground-based transceiver 11 and a mobile platform 20 carrying an RF transceiver (Fig. 1 col. 11 lines 28-39), via a satellite-based transponder 18 (Fig. 1 col. 11 lines 40-44), wherein said mobile platform is traveling within a predetermined coverage region (Fig. 1 col. 11 lines 44-54), the method comprising the steps of using a control center 13 to maintain a list of registered mobile platforms (Fig. 1 col. 18 lines 60-64), wherein said registered mobile platforms are preauthorized to make use of said satellite-based transponder to transmit and

Application/Control Number: 09/851,535 Page 3

Art Unit: 2663

receive data content to and from said ground-based transceiver (Fig. 1 col. 18 line 57), and using said control center to cause said ground-based transceiver to transmit a plurality of polling messages substantially simultaneously (Fig. 11 col. 20 lines 35-40), said polling messages radiating across said coverage region (col. 11 lines 44-54), and wherein each said polling message carries information addressed to a specific one of said registered mobile platforms (Fig. 4 col. 15 lines 21-27) and includes a preliminary, dedicated return channel which its intended said mobile platform is to use for communicating with said ground based transceiver (Fig. 5b col. 15 lines 46-58).

Régarding to claim 2, Haugli discloses the preliminary, dedicated return channel has a minimum predetermined bandwidth (col. 8 lines 14-17).

Regarding to claim 5, Haugli discloses the central controller maintains a database of said return channels in use at all times (col. 22 lines 43-44).

Allowable Subject Matter

- 4. Claims 3, 4, and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 5. Claims 9-13 and 15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
- 6. Claims 14 and 16-18 are allowed.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc T. Duong whose telephone number is 571-272-3122. The examiner can normally be reached on M-Th (9:00 AM-6:00 PM).

Art Unit: 2663

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chau T. Nguyen can be reached on 571-272-3126. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
